

Your COMPLETE Solution

FROM APPLIANZ TECHNOLOGIES, INC.

Sage Solutions

Purchasing Sage ERP, CRM and HR software on an Applianz System allows you to use the investment you already have in your existing PCs and network to run Sage's latest business software without upgrading your hardware.

An Applianz solution means having one-click remote access from all your locations without the hassle or expense of VPNs or expensive additional remote access software. It means knowing that your business is automatically backed up off-site each night with Applianz's unique CompleteAssurance service. It means every user in your company, regardless of location, is up and running the same day your Applianz System arrives. It means having a system that can be easily administered by non-technical professionals.

Applianz is now a Sage Endorsed Solution and Applianz systems are available directly from Sage via your Sage Business Partner. Together with Sage, we have created bundled Applianz solutions around all of the great products listed below. To try any of these solutions right now, [click here for a free live demo of Sage software running on an Applianz system.](#)

SAGE MAS 90

SAGE MAS 200

Sage MAS 90 and 200 systems offer a broad selection of feature-rich solutions including core accounting, business intelligence tools, customer relationship management, e-commerce, HR and payroll, manufacturing, and distribution. Sage MAS 90 and 200 work the way you do with flexibility that enables you to choose the modules that best suit your business needs.

SAGE MAS 500

In today's volatile economy, it's more critical than ever that every aspect of your enterprise be operating at peak efficiency. Built from the ground-up with Microsoft SQL Server, Visual Basic and Microsoft Office technology, Sage MAS 500 ERP is a complete enterprise management solution. Based on Sage Software's core of unmatched financial accounting software, Sage MAS 500 solutions expand to integrate business intelligence, order processing, distribution, and manufacturing. They were developed to help progressive companies streamline operations, manage with insight and springboard to the next level.
